Subject Index

Volume 92, January 10/24–June 27, 2003

A

ABIN-2

Tie-ing the Antiinflammatory Effect of Angiopoietin-1 to Inhibition of NF- κ B, 586

Ablation

Cx43 and Dual-Pathway Electrophysiology of the Atrioventricular Node and Atrioventricular Nodal Reentry, 469

Action potential remodeling

Familial Hypertrophic Cardiomyopathy-Linked Mutant Troponin T Causes Stress-Induced Ventricular Tachycardia and Ca^{2+} -Dependent Action Potential Remodeling, 428

Activator protein-1

Functional Cooperation Between Smad Proteins and Activator Protein-1 Regulates Transforming Growth Factor- β -Mediated Induction of Endothelin-1 Expression, 1288

Adenosine

Surviving Hypoxia: The Importance of Rafts, Anchors, and Fluidity, 821

Adenosine receptors

Mast Cell-Mediated Stimulation of Angiogenesis: Cooperative Interaction Between A_{2B} and A_3 Adenosine Receptors, 485

Adenovirus

Gene Therapy With Inducible Nitric Oxide Synthase Protects Against Myocardial Infarction via a Cyclooxygenase-2-Dependent Mechanism, 741

Adhesion molecules

Cardioprotection With High-Density Lipoproteins: Fact or Fiction?, 258

α -Adrenergic

Vasomodulation by Skeletal Muscle-Derived Nitric Oxide Requires α -Syntrophin-Mediated Sarcolemmal Localization of Neuronal Nitric Oxide Synthase, 554

β -Adrenergic receptors

β -Adrenergic Receptor-Stimulated Apoptosis in Cardiac Myocytes Is Mediated by Reactive Oxygen Species/c-Jun NH_2 -Terminal Kinase-Dependent Activation of the Mitochondrial Pathway, 136
Protein Kinase A Hyperphosphorylation Increases Basal Current but Decreases β -Adrenergic Responsiveness of the Sarcolemmal Na^+ - Ca^{2+} Exchanger in Failing Pig Myocytes, 897

Adrenergic regulation

Is Depressed Myocyte Contractility Centrally Involved in Heart Failure?, 350

β -Adrenergic stimulation

Cyclic Variation of Intracellular Calcium: A Critical Factor for Cardiac Pacemaker Cell Dominance, e45
Hibernating Myocardium Retains Metabolic and Contractile Reserve Despite Regional Reductions in Flow, Function, and Oxygen Consumption at Rest, 48
Sarcoplasmic Reticulum Ca^{2+} Release Is Not a Dominating Factor in Sinoatrial Node Pacemaker Activity, e41

Adult stem cells

Stem Cells to Repair the Heart: A Clinical Perspective, 6

Advanced glycosylation end products

A Breaker of Advanced Glycation End Products Attenuates Diabetes-Induced Myocardial Structural Changes, 785

AGE

Getting Better Without AGE: New Insights Into the Diabetic Heart, 704

Aging

HMG-CoA Reductase Inhibitors Reduce Senescence and Increase Proliferation of Endothelial Progenitor Cells via Regulation of Cell Cycle Regulatory Genes, 1049
Matrix Metalloproteinase-3 Genotype Contributes to Age-Related Aortic Stiffening Through Modulation of Gene and Protein Expression, 1254

Akt

FIZZ1/RELM α , a Novel Hypoxia-Induced Mitogenic Factor in Lung With Vasoconstrictive and Angiogenic Properties, 1065

Allograft inflammatory factor-1

AIF-1 Is an Actin-Polymerizing and Rac1-Activating Protein That Promotes Vascular Smooth Muscle Cell Migration, 1107

Alternans

Transmural Heterogeneity of Calcium Handling in Canine, 668

Alveolar fluid clearance

Vectorial Sodium Transport Across the Mammalian Alveolar Epithelium: It Occurs but Through Which Cells?, 348

Alveolar fluid reabsorption

Alveolar Type 1 Cells Express the $\alpha 2$ Na,K-ATPase, Which Contributes to Lung Liquid Clearance, 453

Alveolar type 1 cells

Alveolar Type 1 Cells Express the $\alpha 2$ Na,K-ATPase, Which Contributes to Lung Liquid Clearance, 453

Alveolar type 2 cells

Alveolar Type 1 Cells Express the $\alpha 2$ Na,K-ATPase, Which Contributes to Lung Liquid Clearance, 453

Alveolar type I/II cells

Vectorial Sodium Transport Across the Mammalian Alveolar Epithelium: It Occurs but Through Which Cells?, 348

American Heart Association

Circulation Research: Reflections on the Founding Editor, Carl J. Wiggers, 253

Circulation Research: The Impact of a Journal and Its Editor on a Career in Experimental Cardiology, 1057

Aneurysm

Urokinase-Type Plasminogen Activator Plays a Critical Role in Angiotensin II-Induced Abdominal Aortic Aneurysm, 510

Angiogenesis

Deficiency of the Cysteine Protease Cathepsin S Impairs Microvessel Growth, 493

Enhanced Smooth Muscle Cell Coverage of Microvessels Exposed to Increased Hemodynamic Stresses In Vivo, 929

FIZZ1/RELM α , a Novel Hypoxia-Induced Mitogenic Factor in Lung With Vasoconstrictive and Angiogenic Properties, 1065

HMG-CoA Reductase Inhibitors Reduce Senescence and Increase Proliferation of Endothelial Progenitor Cells via Regulation of Cell Cycle Regulatory Genes, 1049

Intravenous Administration of Human Bone Marrow Stromal Cells Induces Angiogenesis in the Ischemic Boundary Zone After Stroke in Rats, 692

Lepr^{db} Diabetic Mouse Bone Marrow Cells Inhibit Skin Wound Vascularization but Promote Wound Healing, 1247

Lessons From Lymph: Flow-Guided Vessel Formation, 701

Mast Cell-Mediated Stimulation of Angiogenesis: Cooperative Interaction Between A_{2B} and A_3 Adenosine Receptors, 485

Nitric Oxide Enhances Angiogenesis via the Synthesis of Vascular Endothelial Growth Factor and cGMP After Stroke in the Rat, 308

Role of Redox Signaling in the Autonomous Proliferative Response of Endothelial Cells to Hypoxia, 1010

The Antiinflammatory Endothelial Tyrosine Kinase Tie2 Interacts With a Novel Nuclear Factor- κ B Inhibitor ABIN-2, 630

Angioplasty

Application of Nanoparticle Technology for the Prevention of Restenosis After Balloon Injury in Rats, e62

Neuron-Derived Orphan Receptor-1 (NOR-1) Modulates Vascular Smooth Muscle Cell Proliferation, 96

Angiopoietin-1

Angiopoietin-1 and Pulmonary Hypertension: Cause or Cure?, 947

Protective Role of Angiopoietin-1 in Experimental Pulmonary Hypertension, 984

Tie-ing the Antiinflammatory Effect of Angiopoietin-1 to Inhibition of NF- κ B, 586

Angiopoietin-2

Mast Cell-Mediated Stimulation of Angiogenesis: Cooperative Interaction Between A_{2B} and A_3 Adenosine Receptors, 485

Angiotensin

- Divergent Roles of Angiotensin II AT₁ and AT₂ Receptors in Modulating Coronary Microvascular Function, 322
- Interactions Between Angiotensin II and Baroreflexes in Long-Term Regulation of Renal Sympathetic Nerve Activity, 1282

Angiotensin II

- Angiotensin II: A Vasoactive Hormone With Ever-Increasing Biological Roles, 9
- DNA Microarray Profiling to Identify Angiotensin-Responsive Genes in Vascular Smooth Muscle Cells: Potential Mediators of Vascular Disease, 111
- What Sets the Long-Term Level of Renal Sympathetic Nerve Activity: A Role for Angiotensin II and Baroreflexes?, 1330

Anoxia

- Fueling the Heart, 1276

Antioxidant enzymes

- HFE Mutation and Dietary Iron Content Interact to Increase Ischemia/Reperfusion Injury of the Heart in Mice, 1240

Antioxidants

- Long-Term Vitamin C Treatment Increases Vascular Tetrahydrobiopterin Levels and Nitric Oxide Synthase Activity, 88

Aorta

- Caspase-Dependent Cell Death Mediates the Early Phase of Aortic Hypertrophy Regression in Losartan-Treated Spontaneously Hypertensive Rats, 777

AP-1

- Glucose Regulates Monocyte Adhesion Through Endothelial Production of Interleukin-8, 371

2-APB
